GENERAL SECRETARIAT

COMMUNICATION UNIT

Yaounde, **24 JUL 2017**

Press release

The Minister of Public Health informs the general public and especially patients with chronic kidney failure of the arrival on July 21 of more than eleven tons of dialysis consumables by Cargo Aircraft.

These supplies have since been distributed to all the Hemodialysis Centres in the country, which have already resumed their normal functioning. A much larger quantity of shipment by sea, within the context of the execution of the 2017 contracts, has been planned for the beginning of August.

Mr. André Mama Fouda confirms the implementation of the Very High Directives of the Head of State to ensure the constant availability of the components of Dialysis Kits and the maintenance in good working condition of the equipment in the Centres. He also urges the medical personnel to be more professional and available for an adequate management of each patient.

André MAMA FOU DA
